INDEX TO VOLUME L

ABT, A. F. See JONES and ABT, 574.
Acidosis during starvation, 1.
——, vital staining and, 20.
Adenine nucleotide, 574.
Adrenal secretion, isolated heart as indicator of, 399.
Adrenalin, effect of, on catalase production, 165.
Alkaline reserve, plasma volume and, in shock, 104.
ALVAREZ, W. C. and E. STARKWEATHER. XVIII. Conduction in the small intestine, 252.
Alveolar air and respiratory volume at low oxygen tensions, 280.
Anaphylaxis and peptone poisoning, nitrogen of blood in, 357.
Anesthesia, catalases of blood during, 54.
——, effect of, on certain metabolites, 82.
ASADA, H. Acidosis during starvation, 1.
——. Vital staining and acidosis, 20.
Asphyxial blood, hyperglycemia-provoking ability of, 177.

BECKER, C. E. See REIMANN and BECKER, 54.
BEHRE, E. H. and O. RIDDLE. The effect of quinine on the nitrogen content of the egg albumen of ring-doves, 364.
BEVIER, G. and A. E. SHEVKY. Urea excretion after suprarenalectomy, 191.
Bioluminescence, physico-chemical studies on, 544, 561.
Blood catalases during anesthesia, 54.
—— changes from short exposures to low oxygen, 216.
Blood diastase, regulation of, 208.
——, nitrogen of, in anaphylaxis and peptone poisoning, 357.
—— pressure, effect of training and practice on, 443.
—— ——, low, treatment of, in shock, 86.
—— volume in lung edema, effect of oxygen on, 157.
—— —— in secondary traumatic shock, 31.
BURGE, W. E. The effect of adrenalin, desiccated thyroid and certain inorganic salts on catalase production, 165.

CANNON, W. B. Studies on the conditions of activity in endocrine glands. V. The isolated heart as an indicator of adrenal secretion induced by pain, asphyxia and excitement, 399.
Cardiac and respiratory centers, reaction of, to low oxygen, 327.
Cardio-vascular reactions in Valsalva experiment, 481.
CARLSON, A. J. See LUCKHARDT, PHILLIPS and CARLSON, 57.
Catalase, influence of organic substances on, 520.
—— production, 165.
Catalases of blood during anesthesia, 54.
Chelonians, neuromuscular respiratory mechanism in, 511.
Circulatory responses to low oxygen tensions, 228.
Compensatory reactions to low oxygen, 302.
Conduction in small intestine, 252.

Coombs, H. C. Some aspects of the neuromuscular respiratory mechanism in chelonians, 511.
Crystalloids in treatment of shock, 119.
Cypridina hilgendorfii, luciférine and luciférase of, 544.
—— ——, production of light by, is not an oxidation, 561.

Dawson, P. M. Effect of physical training and practice on the pulse rate and blood pressures during activity and during rest, with a note on certain acute infections and on the distress resulting from exercise, 443.
——and P. C. Hodges. Cardiovascular reaction in the Valsalva experiment and in lifting with a note on parturition, 481.
Diastase, blood, regulation of, 208.

Edema, lung, effect of oxygen on blood volume in, 157.
Ellis, M. M. Respiratory volumes of men during short exposures to constant low oxygen tensions attained by rebreathing, 267.
Endocrine glands, conditions of activity in, 399.
Erlanger, J. and H. S. Gasser. Studies in secondary traumatic shock:
VI. Statistical study of the treatment of measured trauma with solutions of gum acacia and crystalloids, 119.
VII. Note on the action of hypertonic gum acacia and glucose after hemorrhage, 149.
——. See Gasser and Erlanger, 104.
——. See Gasser, Erlanger and Meek, 31.
Exercise, effect of, on blood pressure, 443.
Eye, infra-red radiant energy and the, 383.

Fujimoto, B. Studies on the regulation of the blood diastase, 208.

Gasser, H. S. and J. Erlanger. Studies in secondary traumatic shock. V. Restoration of the plasma volume and of the alkali reserve, 104.
——, J. Erlanger and W. J. Meek. Studies in secondary traumatic shock. IV. The blood volume changes and the effect of gum acacia on their development, 31.
——. See Erlanger and Gasser, 119, 149.
Gastrin bodies, distribution and extraction of, 527.
Githens, T. S. See Meltzer and Githens, 377.
Glucose, gum acacia and, after hemorrhage, 149.
Goldschmidt, S. See Wilson and Goldschmidt, 157.
Gregg, H. W., B. R. Lutz and E. C. Schneider. Compensatory reactions to low oxygen, 302.
——, ——, ——. The changes in the content of hemoglobin and erythrocytes of the blood in man during short exposures to low oxygen, 216.
Gum acacia and glucose after hemorrhage, 149.
—— ——, effect of, on blood volume changes, 31.
—— —— solutions in treatment of shock, 119.

Hartman, F. L. See Reimann and Hartman, 82.
Heart, isolated, as indicator of adrenal secretion, 399.
Heat, work and, effect of, on pH of sweat, 433.
——, —— ——, —— ——, on pH of urine, 579.
Hemorrhage, gum acacia and glucose after, 149.
Hisanobu, K. On the distribution of the non-protein nitrogen in cases of anaphylaxis and peptone poisoning, 357.

HODGES, P. C. See DAWSON and HODGES, 481.
Hydrogen ion concentration of urine, 579.
HYMAN, L. H. Physiological studies on Planaria. II. Oxygen consumption in relation to regeneration, 67.
Hyperglycemia, asphyxial, 177.

INFRA-RED radiant energy and the eye, 383.
Intestine, small, conduction in, 252.
Intracranial pressure and body temperature, 102.
—— ——, effects of increasing, 352.

JONES, W. and A. F. ABT. The preparation of adenine nucleotide by hydrolysis of yeast nucleic acid with ammonia, 574.

KAKINUMA, K. Studies on the extract of lung, 9.
KANDA, S. Physico-chemical studies on bioluminescence:
I. On the luciférine and luciférase of Cypridina hilgendorfii, 544.
II. The production of light by Cypridina hilgendorfii is not an oxidation, 561.
KEETON, R. W. See LUCKHARDT, KEETON, KOCH and LA MER, 527.
KOCH, F. C. See LUCKHARDT, KEETON, KOCH and LA MER, 527.

LA MER, V. See LUCKHARDT, KEETON, KOCH and LA MER, 527.
LARSON, J. A. See MAY and LARSON, 204.
Light, production of, by Cypridina hilgendorfii, is not an oxidation, 561.
Luciférine and luciférase of Cypridina hilgendorfii, 544.
LUCKHARDT, A. B., R. W. KEETON, F. C. KOCH and V. LA MER. Gastrin studies. II. Further studies on the distribution and extraction of gastrin bodies, 527.
LUCKHARDT, A. B., H. T. PHILLIPS and A. J. CARLSON. Contributions to the physiology of the stomach. LI. The control of the pylorus, 57.
LUCKIESH, M. Infra-red radiant energy and the eye, 383.
Lung edema, effect of oxygen on blood volume in, 157.
—— extract, studies on, 9.
LUTZ, B. R. and E. C. SCHNEIDER. Alveolar air and respiratory volume at low oxygen tensions, 280.
—— —— ——. Circulatory responses to low oxygen tensions, 228.
—— —— ——. The reactions of the cardiac and respiratory centers to changes in oxygen tension, 327.
——. See GREGG, LUTZ and SCHNEIDER, 216, 302.

MANN, F. C. Experimental surgical shock. V. The treatment of the condition of low blood pressure which follows exposure of the abdominal viscera, 86.
MAY, E. S. and J. A. LARSON. Posture-sense conduction paths in the spinal cord, 204.
MEEK, W. J. See GASSER, ERLANGER and MEEK, 31.
MELTZER, S. J. and T. S. GITHENS. The nose-licking reflex and its inhibition, 377.
Metabolites, effect of surgical procedures on, 82.
MILLS, C. A. A note on the question of the secretory function of the sympathetic innervation to the thyroid gland, 174.
MOORE, L. M. Experimental studies on the regulation of body temperature. III. The effect of increased intracranial pressure on body temperature, 102.
——. The effects of increasing the intracranial pressure in rabbits, 352.

NERVOUS, sympathetic control of thyroid function, 174.
Nitrogen of blood in anaphylaxis and peptone poisoning, 357.
—— of egg albumen after quinine feeding, 364.
Nose-licking reflex and its inhibition, 377.

OXIDATION, production of light by Cypridina hilgendorfii, is not an, 561.
Oxygen consumption during regeneration in Planaria, 67.
——, effect of, on blood volume in lung edema, 157.
——, low, alveolar air and respiratory volume at, 280.
—— ——, blood changes from short exposures to, 216.
——, ——, compensatory reactions to 302.
——, ——, effect of, on respiratory volume, 267.
——, ——, reaction of medullary centers to, 327.
—— tensions, low, circulatory responses to, 228.

PARTURITION, cardio-vascular reactions in, 481.
Peptone poisoning, nitrogen of blood in anaphylaxis and, 357.
PHILLIPS, H. T. See LUCKHARDT, PHILLIPS and CARLSON, 57.
Planaria, studies on, 67.
Plasma volume and alkaline reserve in shock, 104.
Posture-sense conduction paths in spinal cord, 204.
Pulse rate, effect of training and practice on, 443.
Pylorus, control of, 57.

QUININE feeding, effect of, on nitrogen of egg albumen, 364.

REGENERATION, oxygen consumption during, 67.
REIMANN, S. P. and C. E. BECKER. The catalases of the blood during anesthesia, 54.
—— and F. L. HARTMAN. Effect of anesthesia and operation on certain metabolites, 82.
Respiratory centers, cardiac and, reaction of, to low oxygen, 327.
—— mechanism in chelonians, 511.
—— volume, alveolar air and, at low oxygen, 280.
—— ——, effect of low oxygen on, 267.
RIDDLE, O. See BEHRE and RIDDLE, 364.

SALTS, inorganic, effect of, on catalase production, 165.
SATANI, Y. Experimental studies of the ureter. The cause of the ureteral contractions, 342.
SCHNEIDER, E. C. See GREGG, LUTZ and SCHNEIDER, 216, 302.
——. See LUTZ and SCHNEIDER, 228, 280, 327.
SHEVKY, A. E. See BEVIER and SHEVKY, 191.
Shock, experimental surgical, 86.
——, plasma volume and alkaline reserve in, 104.
——, secondary traumatic, 31, 104, 119, 149.
——, traumatic, treatment of, 119.
Spinal cord, paths of posture-sense in, 204.
STARKWEATHER, E. See ALVAREZ and STARKWEATHER, 252.
Starvation, acidosis during, 1.
Stomach, physiology of, 57.
Suprarenalectomy, urea excretion after, 191.
Sweat, effect of work and heat on pH of, 433.

TAKEDA, M. On the protective action of some organic substances on catalase in acid medium, 520.

TALBERT, G. A. Changes in the hydrogen ion concentration of the urine, as a result of work and heat, 579.
——. Effect of work and heat on the hydrogen ion concentration of the sweat, 433.
Temperature, body, intracranial pressure and, 102.
Thyroid, desiccated, effect of, on catalase production, 165.
——, function, sympathetic nervous control of, 174.
Training, effect of, on blood pressure in man, 443.

UREA excretion after suprarenalectomy, 191.
Ureteral contractions, cause of, 342.
Urine, hydrogen ion concentration of, 579.

VALSALVA experiment, cardio-vascular reactions in, 481.
Vital staining and acidosis, 20.

WILSON, D. W. and S. GOLDSCHMIDT. The influence of oxygen administration on the concentration of the blood which accompanies the development of lung edema, 157.
Work and heat, effect of, on pH of sweat, 433.
—— —— ——, —— ——, on pH of urine, 579.

YAMAKAMI, K. The hyperglycemia-provoking ability of asphyxial blood, 177.
